CYRILL KIEL MUSNGI

FULL STACK DEVELOPER

Mexico, Pampanga, Philippines | ckmusngi@gmail.com | +639616781306 | LinkedIn

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 6+ years of experience building scalable web applications, backend services, and third-party SaaS integrations. Strong expertise in REST APIs, database design, workflow automation, and cloud-based systems. Proven track record of delivering end-to-end solutions from requirements gathering and system architecture to deployment, integrations, and production support. Experienced in developing reliable business applications that streamline operations and improve efficiency.

TECHNICAL SKILLS

Backend: PHP (Laravel), Node.js (Express), Python (Django), REST APIs, Webhooks, Websocket
Frontend: React.js, JavaScript (ES6+), jQuery, AJAX, Tailwind CSS
Database: MySQL, PostgreSQL
Integrations & APIs: Xero, HubSpot, Monday.com, SaaS Integrations, Workflow Automation
Payment Gateways: Stripe, D24, Prontopaga, FinTech Integrations
Cloud & DevOps: AWS, Google Cloud Platform (GCP), Git

EXPERIENCE

Upstream **Canberra, AU**
Full Stack Developer (Remote) **December 2019 - April 2026**

- Led end-to-end development of full-stack applications, including requirements gathering, business process analysis, database design, testing, deployment, and production support.
- Designed and developed two-way integrations between Monday.com, Xero, HubSpot, and other SaaS platforms using REST APIs and webhooks, ensuring accurate synchronization of business-critical data.
- Built and maintained API integrations and automated data pipelines to streamline workflows, improve data consistency, and reduce manual processes across multiple systems.
- Investigated and resolved production issues across web applications and integration services, improving system stability, reducing synchronization errors, and enhancing platform reliability.

CQ Business Management Software **London, UK**
Full Stack Developer (Remote) **January 2025 - June 2025**

- Developed and delivered full-stack applications and backend systems using Laravel, JavaScript, jQuery, and MySQL, translating business requirements into scalable solutions.
- Designed and implemented RESTful APIs and backend services to support application functionality, system integrations, and seamless data exchange.
- Diagnosed and resolved production issues while collaborating with stakeholders, including the CEO, to define workflows, improve system reliability, and deliver solutions using Agile development practices.

Mcvean Pacific Int'l **Clark, Pampanga**
Associate Software Developer **January 2019 - August 2019**

- Developed web applications using React.js and explored integration with Corda
- Built and presented simple prototypes to clients and gathered feedback for UI/UX improvements
- Collaborated with stakeholders to understand requirements and translate them into functional features

Lagotronics Philippines Inc. **Angeles, Pampanga**
Programmer **August 2017 - May 2018**

- Built animatronic movements using Arduino for smooth motion control
- Helped install robotics systems and fixed coding issues before deployment
- Maintained systems and worked with teams and clients to ensure proper performance

PROJECTS

Automated Distance-Based Pricing System for Patient Transport
Built a Laravel and React.js system that automates transport pricing based on real-time distance using Google Maps API for routing and calculations. Developed a pricing engine that reduced manual fare computation and improved operational efficiency. Deployed on Google Cloud Platform (GCP) for production use.

Client Portal - Custom Quoter System
Designed and developed a secure client portal using Laravel, AJAX, jQuery, and Tailwind CSS for custom quoting and business management. Implemented real-time chat using Laravel Broadcasting and built features for document access, job tracking, and client communication to improve workflow transparency.

Coastal Powder Coating
Developed a quality assurance system using Laravel and React.js integrated with Xero and HubSpot for invoice synchronization. Built drag-and-drop invoice management and QA workflows to streamline order inspection, tracking, and documentation processes.

EDUCATION

University of the Assumption **2013 - 2017**
Bachelor of Science in Information Technology
